One Voice ... One Vision To A **Future Without Cancer**

Dear Colleagues,

It is with great pleasure that we welcome you to the Annual Congress of the National Cancer Institute, Cairo University:

"Bridging Gaps in Oncology", held in Cairo from 5-7 November 2025.

This year's congress continues the legacy of the BGO series, focusing on emerging therapies and innovations that address critical challenges in cancer care. With a rich scientific program featuring cutting-edge research, symposia, workshops, and poster sessions, we aim to create a collaborative platform that unites leading minds in oncology from around the world.

We are proud to partner this year with the Society of Hematologic Oncology (SOHO), Society of Surgical Oncology (SSO) and Oxford University; and to host our Annual Radiology Congress, enhancing the multidisciplinary nature of the event.

All sessions and workshops will be accredited by the American Association of Continuing Medical Education (AACME), ensuring the highest educational standards for all participants.

Alongside scientific enrichment, the congress offers a unique opportunity to experience the vibrant culture and hospitality of Cairo. The beautiful city of Cairo, rich in history and culture, will provide an inspiring backdrop for this conference. We are confident that, beyond the scientific advancements the unique atmosphere of the city will enhance your experience and provide you with lasting memories.

We look forward to an inspiring and memorable congress with your valued participation

Warmest regards,

Conference President

Prof. Mohamed Abdel Mouti
Dean, National Cancer Institute
